

Ribbon Bow Guide

I. Cut ribbon at a 45° angle **between** the names and date that are **right beside each other**.

2. Hold each side of the ribbon and shape two evenly sized loops. Position the middle loop (A) in the center of the names and date.

3. Cross the right ribbon loop over the left one.

4. Thread the right ribbon loop behind the left one, under, and up through the hole. Make sure the tail with the name is facing the front and is not twisted.

5. Pull both loops into a smooth knot. Adjust loops and tails to display names and date evenly on both sides.
